A wooden detachable MVan module is shown in a dark setting. The module features a raised platform with a light-colored wooden top surface. Below the platform are two drawers with dark handles. A black bag is resting on the platform. The module is designed to be attached to a vehicle.

DETACHABLE COMPONENTS

Engineered for various vehicle types, the detachable MVan modules convert your van into a fully equipped camper van.

Our courses

Engineered for various vehicle types, MVan removable modules convert your van into a complete campervan. Each module provides optimal flexibility while occupying minimal space and eliminating the requirement for vehicle certification.

The modules consist of:

Kitchen area featuring a worktop and designated space for a stove or induction hob. There are also specific storage areas available.

Tables, drop-leaf tables, and work surfaces;

Rapid Access Bed;

Systematic and readily available storage;

Cantilevered extraction guides capable of supporting loads of up to 200 kg.

Each module is crafted and developed to fulfill all customer requirements and will be designed in 3D to provide a detailed visualization of the spaces and environments.

1600 €

Refrigerator and Storage
Module

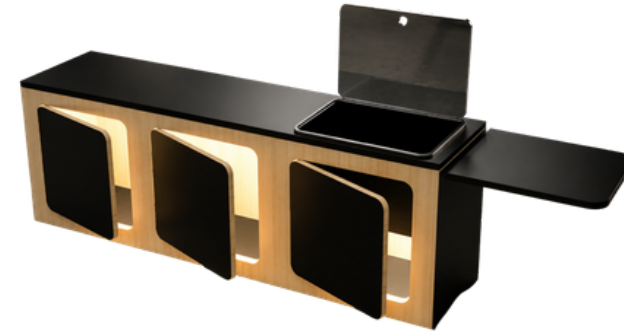

Modulo NEST

Created to convert the van's interior into a cozy sleeping space. It can fit a double bed (200x140 cm) with built-in storage compartments.

The materials are both lightweight and durable, while the design allows for customization. It provides an environment that adjusts to life on the road, without necessitating permanent alterations.

from
2890 €

Modulo OASIS

The camp model features a steel sink, tanks, dedicated storage, and a comprehensive water system.

The system is engineered for rapid assembly and disassembly, fully adhering to safety and approval standards, without necessitating structural alterations to the vehicle.

from
2490 €

COOLER Unit

Camp model featuring a refrigerator compartment, a fold-down table, and a double dedicated storage compartment.

The module is securely attached to the original sliding tracks, guaranteeing both stability and reversibility of the configuration.

from
1880 €

Modulo DOUBLE SYSTEM

The DOUBLE SYSTEM is entirely detachable in three segments. This module design enables cooking both inside and outside the vehicle by adjusting the slides.

The two modules are linked by a pre-drilled board that allows the mattress to breathe, forming a bed that is level with the folded seat.

from
4490 €

Modulo VOYAGER

Pro model, featuring the NEST, OASIS, and COOLER modules.

The VOYAGER module is a completely detachable monoblock equipped with 200 kg slides. It includes electric movement and is prepared for connection to the vehicle, providing both convenience and practicality.

from
6260 €

Modulo HOVEN

Hoven Module. Cozy, detachable, and exceptionally resilient.

The HOVEN module is designed to be very low, specifically for California Beach vans. It includes a pull-out kitchen and a drawer refrigerator, optimizing the space beneath the trunk.

from
2490 €

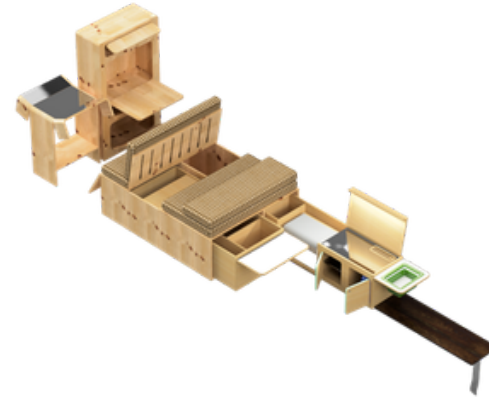

Modulo FREEDOM

The Liberty is a five-block configuration tailored to meet every requirement.

The module consists of two rear lockers that convert into a bed, two front seats combined with a pull-out table made of durable wood, a kitchen module, and a shower equipped with a 12-volt electric boiler for the outdoor shower.

from
7890 €

Modulo FULL CUSTOM

The Full Custom module is a singular unit specifically created for Ford Custom vehicles.

Completely detachable, featuring a bed that transforms into a seat, a retractable kitchen, and room for a refrigerator. The module comprises a standalone water system, a shower, a fold-out table, storage solutions, and a wardrobe that can be converted into a work surface.

from
9980 €

ERASMUS Application Form

A cargo module featuring an accordion bed, a retractable mini kitchen, and compact storage, designed for rapid setups in vehicles with restricted space.

The Erasmus module offers an excellent option for individuals seeking convenient solutions and rapid installations through a plug-and-play approach.

from
4990 €

Accordion bed unit

The module serves as a compact solution intended to convert the rear compartment into a practical sleeping space.

Thanks to its foldable design, it maximizes space, providing enhanced freedom for loading and movement within the van. It is perfect for individuals seeking a straightforward, lightweight, and functional arrangement.

from
1290 €

Modulo MOTORBIKE

The MOTORBIKE module is intended for athletes requiring the transportation of motorcycles or bicycles.

The module features a foldable bed that rests against the wall, with the possibility of incorporating a pull-out kitchen on the side, positioned above a rear wheel cover.

from
4890 €

SPC laminate flooring

Engineered to establish a robust, practical foundation within the vehicle, enhancing the functionality of the area.

The design conforms to the contours of the compartment, allowing for seamless integration with detachable modules. This presents an excellent option for individuals looking to safeguard the underbody and ready the van for upcoming modifications.

from
1290 €

Stainless steel basin

Stainless steel sink measuring 325x265x150 mm, featuring a 90° angled waste, a 19 mm hose connection, a steel plug, and an integrated tap.

Suitable for all types of vehicles

214,82 €

Hob

Induction hob 1800, HENDI, Kitchen Line, 230V/1800W, 319x355x(H)67mm. Digital power, temperature, and timer settings. Maximum capacity: 15 kg.

Appropriate for pots ranging from 120 to 260 mm in diameter.

182,39 €

Vitrifrigo VF16P

The VF16P portable refrigerator-freezer is engineered to provide you with the convenience of transporting fresh food and beverages wherever you travel.

Featuring a compact and lightweight design, weighing just 8 kg, it offers a total capacity of 16 litres, organized into 2 compartments, indicating a thoughtful separation of the items within.

761,14 €

10-liter canister

10-liter tank for the water systems of your removable module.

The container features a sizable resealable opening with a screw-on lid and allows for complete internal inspection.

27,33 €

Submersible pump

A streamlined and effective approach for water management in low voltage systems.

Due to its sleek design, featuring a diameter of merely 38 mm and a height of 104 mm, it can effortlessly fit into even the most confined tanks or canisters.

24 €

ONTAP outdoor shower system

Transform each stop into a moment of complete relaxation. Featuring a 22-liter polyethylene tank, an integrated 12V pump, and a 7-jet multifunction nozzle, it represents the ultimate solution for individuals in pursuit of comfort and cleanliness.

Lightweight, durable, and prepared for immediate use.

399 €

The image shows the rear of a dark-colored camper van with its cargo door open. The interior of the door is lined with a complex, modular metal transport system. This system consists of several vertical racks and horizontal plates, all featuring a perforated design for weight reduction and ventilation. The racks are labeled 'DSRT'. The plates are arranged in a way that allows for the secure transport of various items. The background shows a bright, indoor setting, possibly a showroom or a workshop, with a blue sign that reads 'twinbusch.de' visible on the left.

RACKS AND PLATES

The core of the DSRT line is the modular rear transport system, engineered to accommodate all loading requirements. The diverse options provided enable you to customize the rear of your camper with highly durable plates.

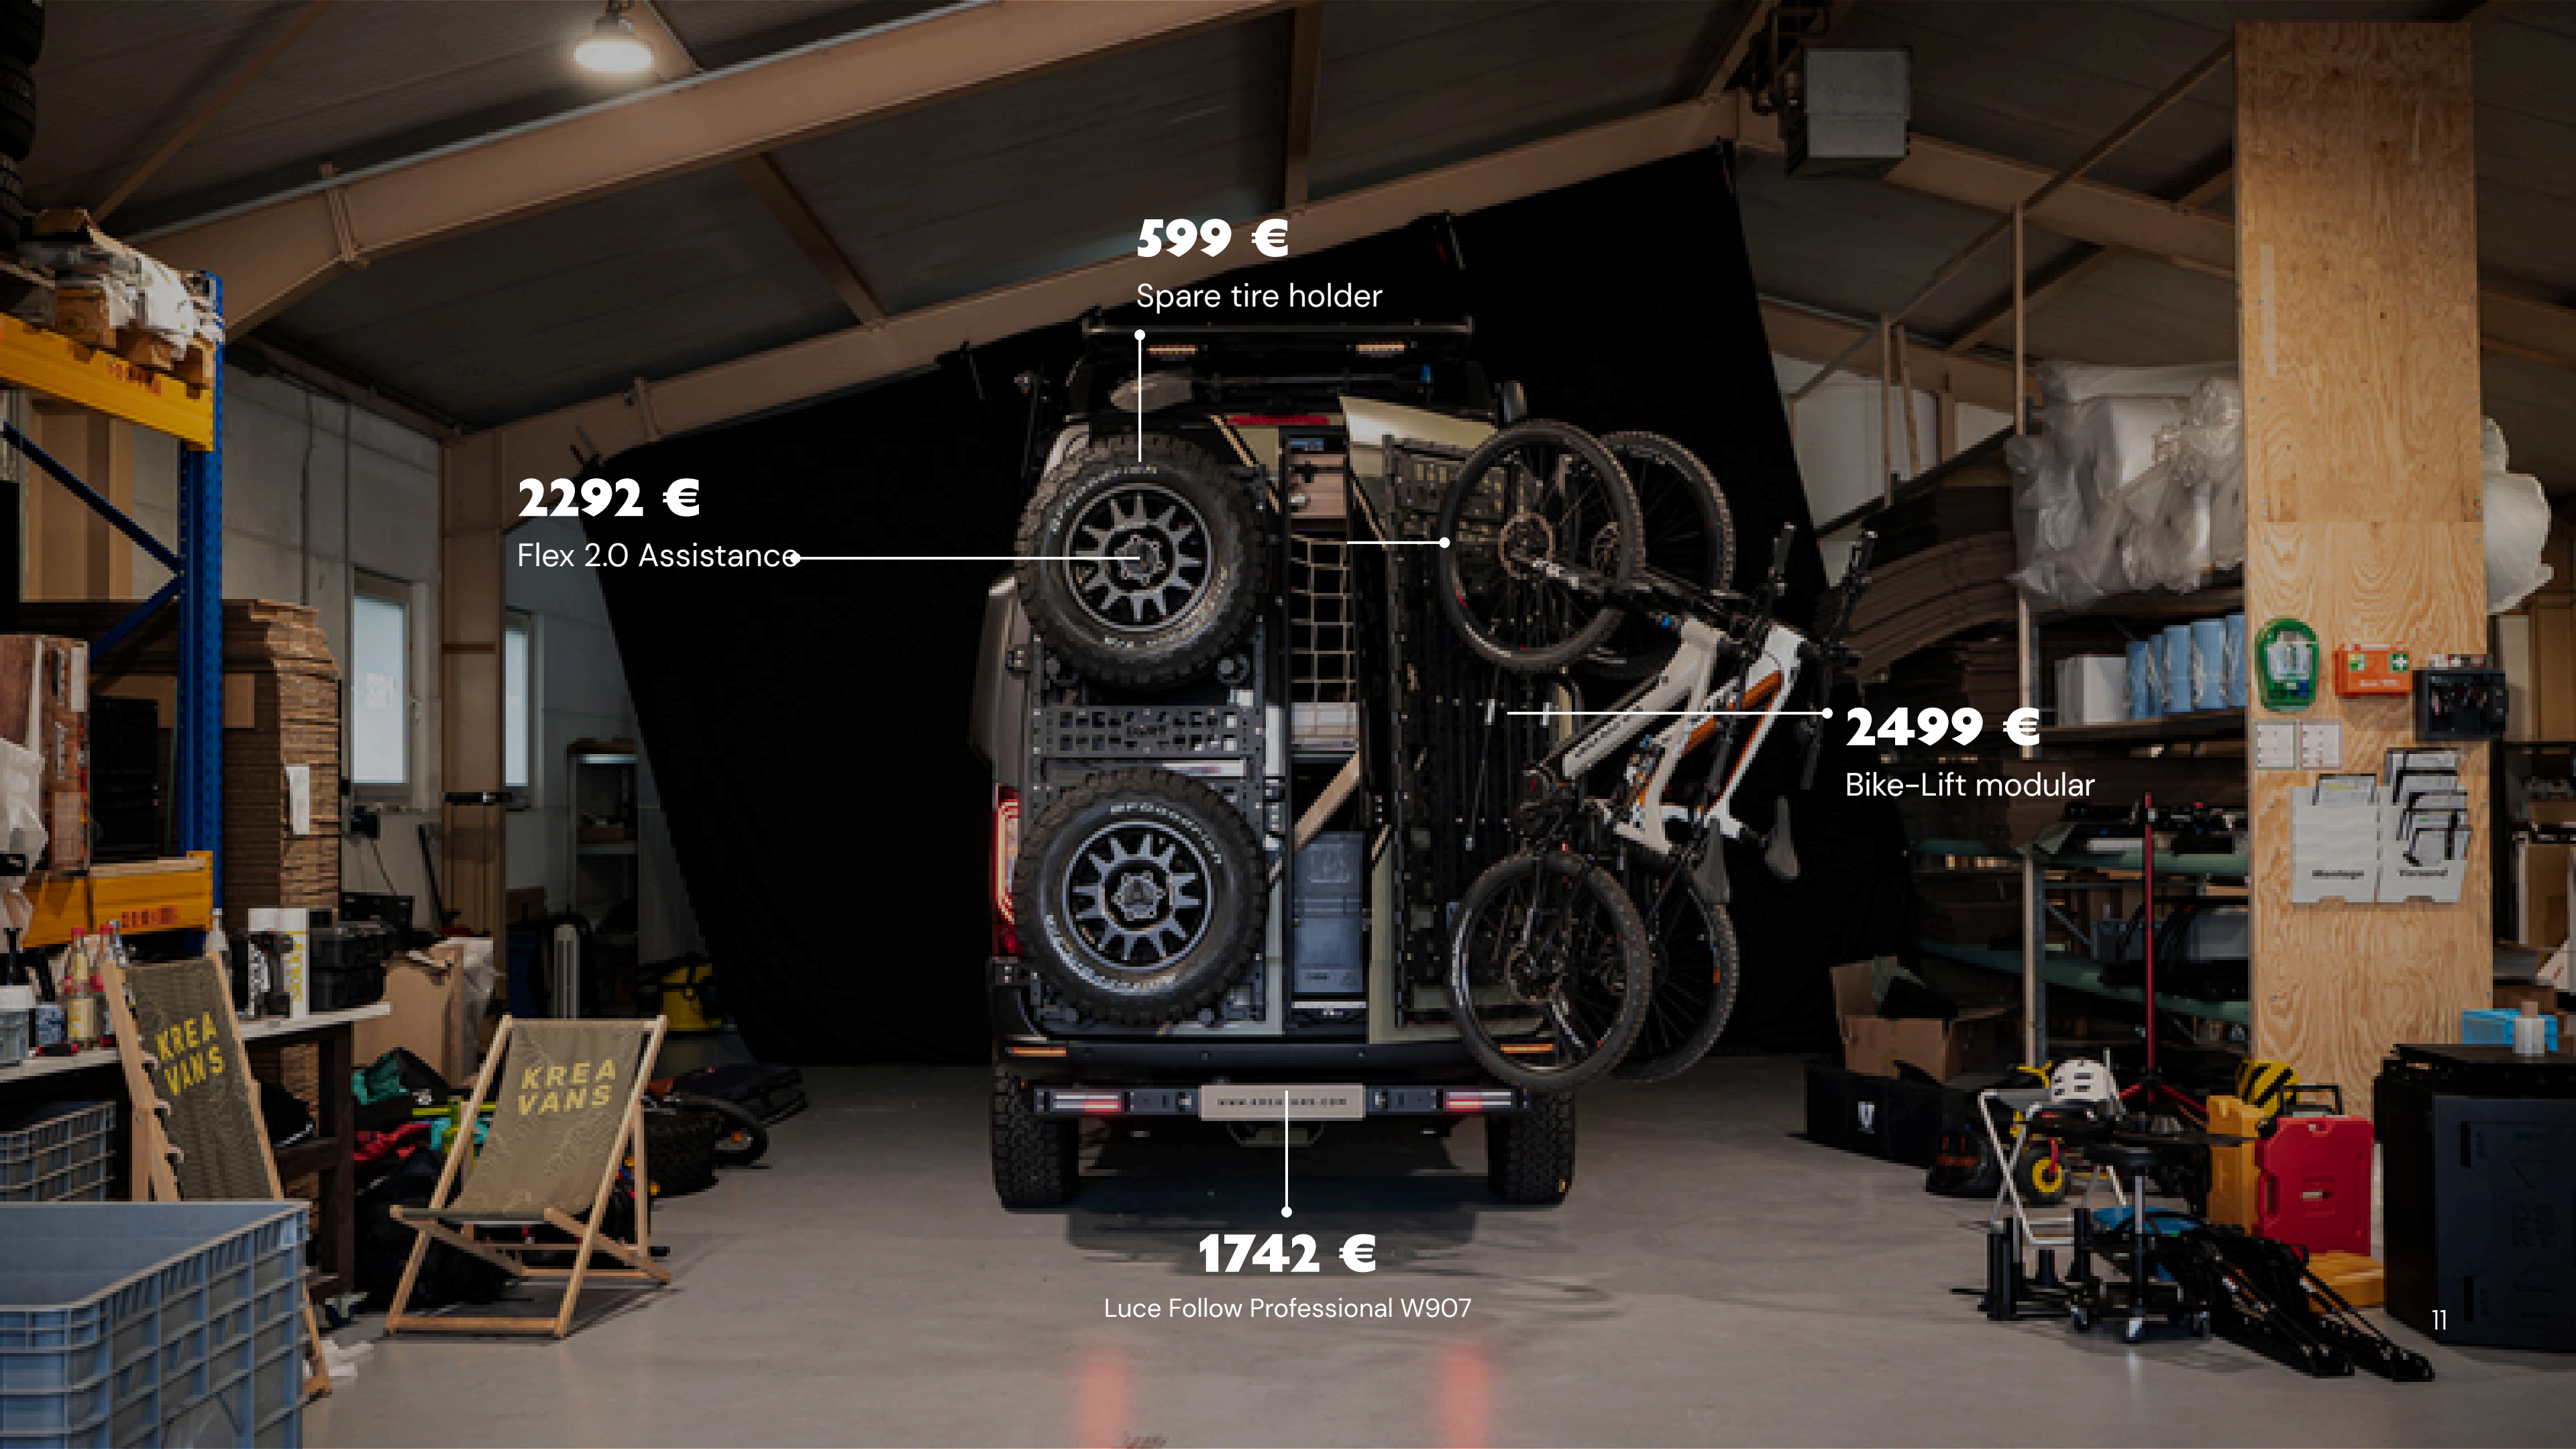

Installation of rack and brackets

MVan Solutions serves as an authorized dealer and installer of Kreavans products, a prominent European brand known for its durable, modular camper accessories featuring a distinctive design.

Through the DSRT by Kreavans line, we provide solutions tailored for true travelers: vanlifers, overlanders, and campers who prioritize reliability, flexibility, and premium quality without compromise.

Each DSRT product is crafted to be practical, long-lasting, and adaptable, and can be acquired individually or installed directly through MVan Solutions.

599 €

Spare tire holder

2292 €

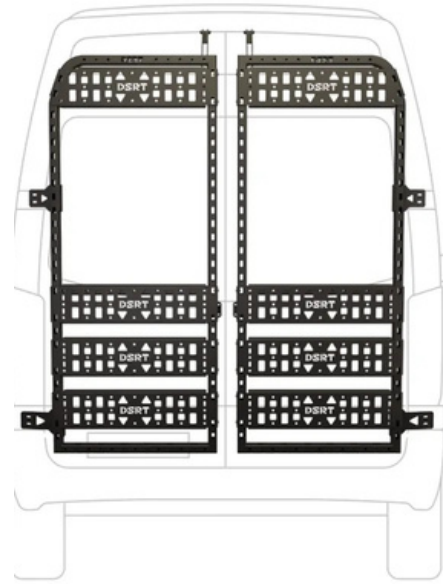

Flex 2.0 Assistance

2499 €

Bike-Lift modular

1742 €

Luce Follow Professional W907

Supperto Flex 2.0

Modular and adaptable – as customizable as your configuration. Constructed from 4mm extruded aluminum, it provides outstanding strength and stability.

KTL and powder coating provide lasting durability. They are easy to install and remove, and due to compatible adapter plates, they can be reused even when switching vehicles.

2292,86 €

Bicycle rack + Container

The Bike-Rack 2er integrates bike transportation and storage into one solution. Bikes are positioned transversely on a compact, S-sized box, making it perfect for both road and mountain bikes.

An optimal solution for individuals seeking to merge flexibility, security, and storage capacity within one system.

2199 €

Box DSRT

It merges strength and versatility, making it perfect for individuals looking for protection and practicality in a compact form. Constructed entirely from premium aluminum and coated with a resilient powder finish.

This box is crafted for durability and to uphold a professional appearance, even with frequent use.

1349 €

Spare tire holder

The spare wheel carrier, with a weight of 3.5 kg, is individually adjustable to accommodate nearly any wheel size. The central screw fastening guarantees a secure and stable connection to the vehicle.

Secures your spare wheel firmly in place and ensures it is always readily accessible, even during challenging trips.

599 €

Base support plates

Compact and straightforward, constructed from premium aluminum, they provide an ideal base for modular systems. Highly resilient.

The integrated system facilitates a flexible and straightforward installation of all modules. Despite its lightweight construction, it accommodates up to 70 kg, preparing your van for any adventure.

1299 €

Ski storage rack

Ski rack designed for the secure transportation of skis and snowboards. With locking mechanisms at both the top and bottom, it can accommodate up to three pairs of skis.

Constructed from powder-coated aluminum, the ski rack is built for durability, providing both convenience and safety on every journey to the snow.

849 €

Engine safeguarding

Engineered exclusively for the Mercedes Sprinter equipped with four- or six-cylinder engines, it provides superior protection during off-road activities. It safeguards the engine against impacts and debris.

Robust, thoughtfully crafted, and essential, it serves as the ideal companion for the most challenging off-road excursions.

1599 €

Transmission safeguarding

The Transmission Guard 4 Cyl serves as an ideal addition to the engine guard, providing dependable protection for the gearbox against impacts and damage during off-road activities.

Robust and engineered for rigorous off-road applications, it guarantees safety and longevity even in the most challenging environments.

499 €

Side panel for the box

For attaching equipment to the side of the Box.

This accessory is perfect for individuals looking for both protection and practicality in a compact form. It is constructed entirely from high-quality aluminum and features a robust powder-coated finish.

170 €

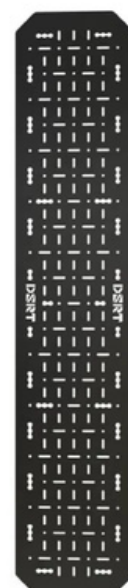

Differential protection system

The vehicle's lowest point is thoroughly safeguarded. The Differential Guard for the MB Sprinter is constructed from robust, powder-coated aluminum, providing protection for the differential against impacts and damage during off-road activities.

It can be coated in any hue, providing fashionable protection while maintaining functionality.

529 €

Side-Rack

The Side-Rack enhances the storage capacity on the side of the vehicle, making it perfect for adventurers requiring additional space. It is especially suitable for equipment that is not used on a regular basis.

Its raised location safeguards your equipment from dirt and theft.

2599 €

Surf-Rack

Fitted with a universal stand featuring specialized inserts that securely hold the board in place during transportation.

Foil boards can be transported without removing the mast, which saves considerable time and provides greater freedom to enjoy the ride.

1399 €

ELECTRICAL SYSTEM

At MVan Solutions, we develop tailored electrical systems, crafted following an extensive initial analysis, allowing us to suggest the solutions that best align with your travel preferences and power requirements.

Energy and comfort throughout every journey

Convert your van into a genuine sanctuary on wheels, prepared to join you on every journey.

RV electrical systems play a crucial role in supplying power to devices and systems that enhance comfort, safety, and functionality while on board.

At MVan Solutions, we develop tailored electrical systems, crafted following an extensive initial analysis, allowing us to suggest the electrical solutions most appropriate for your travel preferences and range requirements.

Battery service

Spot Flexible 3200k

The LED spotlight boasts a practical and elegant design, equipped with a flexible neck and a sleek black finish, allowing for easy positioning in any location. It delivers a warm, focused output of 105 lumens.

Featuring a power consumption of 2W, it includes a built-in USB port for charging smartphones, tablets, or other USB-compatible rechargeable devices.

32 €

Adjustable Spotlight 4000k

A flexible lamp featuring a practical and elegant design, equipped with a flexible neck and a black finish, enabling it to be positioned as required.

It produces a vivid and focused light of 90lm, featuring a neutral white hue.

59,17 €

Adjustable LED floodlight

This recessed spotlight is designed with an opal glass lens and a brushed aluminum frame, offering a contemporary and sophisticated appearance.

With a diameter of 68 mm, it is suitable for a 52 mm hole and produces a warm white light at 3200K. Intended for indoor applications.

34,65 €

2000W Pure Sine Wave Inverter

2000W Pure Sine Wave Inverter designed to convert direct current into alternating current, optimizing the efficiency of your photovoltaic panel.

With a continuous output of 2000W and a peak of 4000W, it is suitable for use with lithium batteries.

559,98 €

Power Plant + Lithium Ion Battery

Energy solution tailored to fit beneath the driver or passenger seat.

Featuring a 100Ah LiFePO₄ battery, a 25A DC-DC converter, and a 25A MPPT regulator (32V, 290W), it enables charging through an alternator, AC outlet, or solar power.

1688,48 €

Power Service PLUS 25 Amperes

A genuine travel charger, designed to recharge service batteries more quickly than the alternator by itself.

The Plus and Gold versions include a charge regulator for controlling solar panels and a 230V mains charger. This device ensures a complete charge in half the time compared to an alternator.

586,56 €

Presca Scanstrut USB-A+C + 12V

The Flip Pro Duo SC-MULTI-F2 is a high-performance multi-power outlet, specifically engineered to endure the challenges of the nautical environment.

Integrates a high-power USB-A / USB-C charger and a 12V socket into a single, compact, and robust module, ideal for ensuring devices remain charged while on the move.

62 €

Scanstrut Waterproof USB-A Port

The SC-USB-01 USB socket is engineered to charge electronic devices under any weather conditions, specifically designed and developed to endure atmospheric elements in the maritime sector.

The UV-resistant container and stainless steel components provide resistance to water and rain, guaranteeing safety and reliability in outdoor settings.

37,50 €

Portable Power Station VoltaB

A portable electric power station engineered to provide dependable power wherever needed.

Perfect for vans, outdoor activities, events, and electric mobility, VOLTAB merges power, quiet operation, and sustainability into one device. It serves as a genuine alternative to conventional generators.

3099 €

AC-DC 60A Battery Charger

The BC60WBPRO is a smart charger engineered to charge 12V batteries efficiently, safely, and rapidly.

With a maximum charging current of 60A, it ensures optimal performance across various applications, including cars, boats, campers, and energy storage systems.

252 €

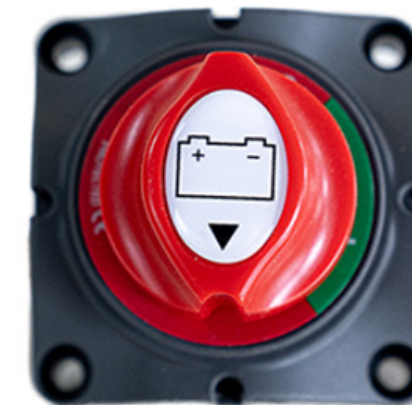

Third Traffic Signal

The third brake light features LED lights and chrome trim. This waterproof light bar is designed to withstand various weather conditions and is resistant to the intrusion and corrosion caused by sand, dust, dirt, water, snow, and other elements.

Can be incorporated into any vehicle and ensures optimal braking safety.

59,58 €

Mini Size Current 50 Amperes

The battery switch enables you to disconnect the power supply to the vehicle or the onboard battery.

Constructed from tinned copper and ABS plastic, the tin plating enhances the antioxidant and discoloration characteristics of red copper, prolonging its rust resistance without compromising conductivity.

27,36 €

Koven LiFePO4 100Ah

Engineered for installation beneath the seat, this LiFePO4 battery merges energy density with the safety features of Lithium-Iron-Phosphate technology.

Featuring more than 4,000 life cycles, integrated Bluetooth connectivity for monitoring, and a 5-year warranty, it stands as the premium option for individuals who refuse to settle.

451,40 €

Koven LiFePO4 180Ah

This battery exemplifies technological superiority in the realm of vanlife. With its durable ABS casing and optimized size, it is specifically engineered for installation beneath the seat.

Featuring more than 4,000 life cycles, integrated Bluetooth for monitoring, and a 5-year warranty, it stands as the top option for individuals who refuse to settle.

730,78 €

Koven LiFePO4 270Ah

Thanks to its metal casing and optimized dimensions, the natteria is designed to fit perfectly under the seat of your van.

Featuring more than 4,000 life cycles, integrated Bluetooth for monitoring, and a 5-year warranty, it stands as the top option for individuals who refuse to settle.

962,58 €

Koven LiFePO4 300Ah

Forget the heavy weight and limited lifespan of conventional batteries. This LiFePO4 battery exemplifies technological advancement for the vanlife community.

Constructed from reinforced ABS and featuring optimized dimensions, it is intended to fit seamlessly beneath the seats of the leading vans and campers available in the market.

925,98 €

Koven LiFePO4 330Ah

With 330Ah of pure LiFePO4 technology, this battery serves as the essential core of intricate electrical systems.

Created for dedicated travelers, it provides more than 4,000 charging cycles and features integrated Bluetooth monitoring, with a weight of only 27kg. The top-tier solution for ensuring you never have to compromise on your onboard appliances.

973,56 €

Koven LiFePO4 700Ah

Engineered for installation beneath the seat, this 12.8V LiFePO4 battery merges energy density with the safety features of Lithium-Iron-Phosphate technology.

With more than 4,000 life cycles, integrated Bluetooth connectivity for real-time monitoring, and a 5-year warranty, it stands as the premium option for individuals who refuse to compromise while on the road.

2438,78 €

A dark-colored van is shown from a front-quarter perspective, parked in a desert landscape. The van's headlights are on, and it has a heavy-duty front bumper with auxiliary lights. The background shows a vast, arid desert under a clear sky.

HEATING

Dependable, secure, and efficient heating systems, crafted to provide thermal comfort throughout the year. Experience complete comfort in your van even during the coldest months, without the need to keep the engine running.

The solutions selected by MVan

Traveling in a campervan is not solely a summer enjoyment. With a permanent heating system, you can experience complete comfort in your van even during the coldest months, without the need to keep the engine running.

At MVan Solutions, we create and implement dependable, secure, and high-efficiency heating systems, crafted to provide thermal comfort throughout the entire year.

This is the reason we exclusively utilize Autoterm products.

756 €
Autoterm Air 2D

891 €
Autotherm Air 4D
System

Autoterm 2D Heater

The Autoterm Air 2D stands as the most compact diesel air heater available in the lineup. Featuring a heating output of 2 kW, it is perfectly suited for small vehicles.

The Autoterm 2D heater produces up to 75 m³ of warm air each hour while utilizing a maximum of only 0.24 liters of diesel fuel. Its energy consumption reaches a maximum of 29 W/h.

756,40 €

Autoterm 4D Heating System

Autoterm Air 4D heater featuring a heating capacity of 4KW for air heating. The heating power is adjustable manually in performance mode. The Autoterm Air 4D possesses an ECE test mark, allowing for installation without the requirement of registration.

891,81 €

Autoterm 9D Heater

The most powerful heater in the Air series, designed for heating expansive areas or interiors. Perfect for all types of vehicles, ranging from camper compartments to boat interiors.

Dependable performance is maintained even in low temperatures, down to -45 °C, with a diesel consumption ranging from 0.42 to 1.00 litres per hour.

1738,58 €

Combi Boiler 7L Autoterm

A compact, advanced hot water boiler featuring three flexible heating options. The Combi Boiler heats water from 20 to 60°C in about 60 minutes.

Monitored and managed through the Autoterm Boiler Control control panel.

1178,75 €

Stainless steel container suitable for inspection

A stainless steel container is beneficial for the installation of diesel heaters on the exterior of a camper or van, helping to conserve space.

The enclosure safeguards the heater from external elements.

Offered in two versions:
per Autoterm 2D
per Autoterm 4D

183,29 €

Panel Comfort Control Autoterm

The Comfort Control panel serves as your perfect companion for operating the Autoterm air heater in your camper or van.

With its user-friendly interface and a variety of features, you can tailor the comfort of your vehicle throughout the year.

197,93 €

CRYSTALS AND PORTALS

At MVan Solutions, we specialize in the installation of windows, skylights, and ventilation systems that enhance vehicle habitability by facilitating air exchange, providing insulation, and offering protection.

The line suggested by MVan

Effective management of natural light and ventilation is crucial for ensuring a comfortable living experience in the van throughout all seasons.

At MVan Solutions, we specialize in the installation of windows, skylights, and ventilation systems that enhance vehicle habitability by facilitating air exchange, providing insulation, and offering protection.

Each project is customized according to the van model, its purpose, and travel requirements, incorporating functionality, design, and construction quality.
